Commentary

Dramatic action was taken by the central banks around the world including the Bank of Canada which lowered the overnight lending rate another ½ percentage point. Lowering interest rates and providing liquidity to the market appears to have stabilized the credit crisis situation and allowed the market a confidence that has not been seen this year.

All major North American stock indices were up for the month of April by at least 4%. The TSX is positive year-to-date with a return of 0.7%

TD Bank (TSX: TD) increased its quarterly dividend to \$0.59 per share, a 3.5% increase from last quarter (Feb 08).

The Prime Rate Plus portfolio has a current dividend yield of approx. 4.6%.
